SCOTCH PINE SEEDLINGS—GROWING AND GRADING

Grown this year with fewer trees per square foot of bed, we have an average stockier tree. Spacing and soil quality have produced an average taller tree; almost none over 10 inches, but a far better percentage than before in the grade sizes best for machine planting.

For all spring shipping, the 4 to 8 inch grade will replace the 3½ to 8 inch grade without price or order change.

For those growers who prefer bigger stock, part of our beds, which average taller, will be graded 3 to 6 inch and 6 to 10 inch; this for easier, faster handling in the field and possibly better first year growth.
